SIGS (Special Interest Groups)

When you plan to attend a SIG meeting and have specific

questions or problems you would like someone to work on

or answer, please email us at novicesiglv@yahoo.com. This will help assure that we will try to have someone there

with the expertise. The email Subject Line: SIG Help The meeting formats for the Helping Hands & How-to SIGS are usually one-on-one help as compared to the Novice SIG which is group attendance with questions and answers from the audience during and after the presentations.

For help via E-mail, send an E-mail to novicesiglv@yahoo.com.

The meeting formats for the Helping Hands & How-to SIGS are usually one-on-one help as compared to the Novice SIG which is group attendance with questions and answers from the audience during and after the presentations.

UPCOMING CLUB EVENTS

All meetings cancelled until further notice!

ALL MEETING ARE CANCELED UNTIL FURTHER NOTICE!

To help combat the spread of the COVID-19 virus, Nevada Governor Steve Sisolak has ordered the closing of nonessential businesses, including restaurants. So all LVPCUG meetings at New York Pizza are cancelled until the closure order is lifted and public dining is resumed.

I hope everyone is doing fine with all that is going on in the world today

Meet the new Microsoft Edge: Your move, Google

Microsoft has started rolling out its new Edge browser to the general public. Its new features should be welcomed by consumers and enterprise customers, but how will Google respond?

Windows 10 Flaw Lets Malware Disguise Itself as Legit Software

The National Security Agency is urging users, especially enterprises, to install the patch from Microsoft. In the wrong hands, the vulnerability can be used to spoof the digital certificates software companies use to verify that their applications are authentic.
The US National Security Agency has

warned Microsoft about a vulnerability in Windows 10 that can be abused to make malware look like a legitimate program.

On Tuesday, Microsoft released a patch to fix the flaw, which also affects Windows Server 2016 and Windows Server 2019. The "spoofing vulnerability" involves the operating system's CryptoAPI, also known as Crypt32.dll, which can be used to encrypt and decrypt data.

# How to Change Microsoft Edge to Search Google Instead of Bing

Microsoft's new Edge browser uses Bing as its default search engine, but if you prefer something else you can change that. Edge can use any search engine that supports OpenSearch as its default.

Microsoft Edge no longer uses the old "search provider" plug-in system that Internet Explorer used, so you don't have to worry about installing those. Instead, Edge features an easily accessible option for changing your search provider.

We'll be switching to Google as our example here, but you can select another search engine if you like. For example, these instructions also work with DuckDuckGo.

Using Windows 10 Voice Recorder | Daves Computer Tips

It opened to an almost blank window with the words Voice Recorder in the top left corner, three dots representing an options menu in the bottom right corner and a round purple icon in the center with a picture of a microphone. This is the record button. Click to start and click again to stop.

How To Move Your Website To Another Server | Daves Computer Tips

FileZilla Is Your Friend

In 2018 I wrote about How Not To Restore A Crashed Website, but on that occasion, it was a rescue mission because of a crash beyond my control. Last week I needed to move an existing website from one hosting plan to another within the same hosting company, GoDaddy, a company that gets a lot of stick and harsh criticism, most of which is unfounded in my opinion.
